

Project Design Phase –1

Proposed Solution

Date	15 October 2022
Team ID	PNT2022TMID17427
Project Name	Gas leakage monitoring and alerting system for industries
Maximum Marks	2 Marks

Domestically we use natural gas and it is very useful for burning purposes. If this gas is leaked in our kitchens, offices or factories and not sensed in time, it may lead to a fatal disaster, and may cause human loss. For this purpose, we came forward with an idea of making such an electronic device to sense that leakage and alarm the respective persons to solve that leakage problem and save assets and human lives. It also down our economical rate

Problem Statement (PS)	I am (Customer)	I am trying to	But	Because	Which makes me feel
------------------------	-----------------	----------------	-----	---------	---------------------

PS-1	Industrialist	Monitor gas leakage in the industry	I don't have any system for monitoring	The affordable of the system is high and the systems are sometimes making disasters	Unsafe
PS-2	Industrialist	Control the gas leakage	Also, the installation process is too complicated	The number of sensors is unpredictable and the positioning of equipment is improper	Disastrous
